MONT TÉTONS : un guide de survie

An original idea by Anick Lemay

MONT-TÉTONS : le guide de survie, (**BREAST CANCER** : A Survival Guide) presents five distinct stories, each at different stages, but all with similar characteristics.

Anick Lemay accompanies these women on their personal journeys as they face five stages in their new reality of living with breast cancer: the diagnosis, pre-op tests and surgery, chemotherapy, radiation therapy, and breast reconstruction. The subject is gently treated with humour and sensitivity.

Broadcast
September 30, 7 p.m.

*1 original broadcast and 4 rebroadcasts
